

Lanreé Aesthetics

Treatment Price List

Welcome to the journey of beauty

"Our dedicated skin care experts offer more than just beauty aesthetics with the emphasis of individualized personal care treatment. We strive to make you feel welcomed, pampered and remembered. Lanréé aims to educate and provide every customer with the essential and proper health management to improve their skin concerns and restoring the appearance of the skin.

We offer an array of aesthetic dermatological procedures using the latest cutting-edge techniques in the industry. Our treatments and products are made from natural ingredients that are effective in maintaining healthy skin from within..."

Lanréé Management Team

Deep Cleansing & Acne Facial

Consultation

\$15

At Lanréé, our skin care experts will provide customers a one-on-one consultation during first visit. This is done to gain an accurate and deeper understanding of our customer's skin condition with a thorough personal and lifestyle habits analysis. This analysis could generate the accurate root of our customer's skin concern and then our therapist will advise a treatment that is suitable for you.

*Note

1. Treatment price and duration listed is for general indication only. It may vary due to different individual's concerns.
2. Price may vary and quote will be provided upon consultation based on area size of treatment if applicable.
3. Package price has to be paid upfront.

Deep Cleansing Facial Treatment

30 minutes – \$85

Lanréé skin care expert would select the most suitable type of deep cleansing treatment to thoroughly cleanse all impurities and make up residue on the skin surface to prep the skin before proceeding to the subsequent intensive treatment. This step would improve congestions by removing blackheads and blocked pores.

Aqua Microbubble Infusion Deep Cleansing Treatment

This treatment would include a deep skin cleansing procedure to remove makeup residues, followed by a hot facial patch and facial steam to remove blackheads and whiteheads on face. Then microbubble suction to remove impurities, blemishes and blackheads accompanied with a face mask and LED Light Therapy

5 Elements Active Acne Microneedling Facial Treatment

60 minutes – \$300

At Lanréé, 5 elements personalised intensive facial treatments are designed for all skin types with specific concerns. Our skin experts will first conduct a thorough analysis of your skin. Then, Lanréé professionals will select the most suitable combination of treatments and therapies to resolve

the root of all skin conditions. 5 elements intensive microneedling facial treatments emphasise on providing customers with the fastest and most convenient result where our experts meticulously monitor customer's progress after each element is conducted, ensuring optimal results are achieved.

HA Skin Booster

Hyaluronic Acid Skin Booster

60 minutes – **\$360**

Choice of either

- Pure 100% Hyaluronic Acid Booster (5ml)
- Anti-Aging Collagen Booster (5ml)
- Whitening & Spot Fading Booster (5ml)

*Note

1. Treatment price and duration listed is for general indication only. It may vary due to different individual's concerns.
2. Price may vary and quote will be provided upon consultation based on area size of treatment if applicable.
3. Package price has to be paid upfront.

Hydro skin booster of Hyaluronic Acid can now be infused into the epidermis layer of the skin without the use of any needles or injection with the Titanium Micro Water Gun used for Needle Free Skin Booster & Mesotherapy infusion by air pressure pulse technology through micro pores opening of the skin. This can add direct moisture to the epidermis skin to provide even distribution with no discomfort and downtime. It has high anti-aging effect for maintaining elastic, hydration and even out the skin tone.

Astro Light Photodynamic Therapy

20 minutes – \$30 | 40 minutes – \$55

Photodynamic Therapy (PDT) is a non-invasive procedure created to increase cell turnover and stimulate collagen production in an effort to treat sun damage, severe acne, rosacea, enlarged sebaceous glands, wrinkles and fine lines. PDT utilises a photosensitising molecule with a light source of specific wavelength to activate the oxygen molecules that are readily available which helps boost skin immunity and natural recovery.

Red Light Therapy

This therapy smooths the appearance of fine lines and calms inflammation. Red light is effectively penetrated into the skin stimulating it to produce more collagen naturally for a smoother and firmer skin.

It has the ability to improve all signs of aging and triggers repair responses in your skin which produces new cells and helps them metabolise nutrients more effectively.

This will lead to fading dark spots, more even skin tone and an overall brighter, healthier complexion.

Yellow Light Therapy

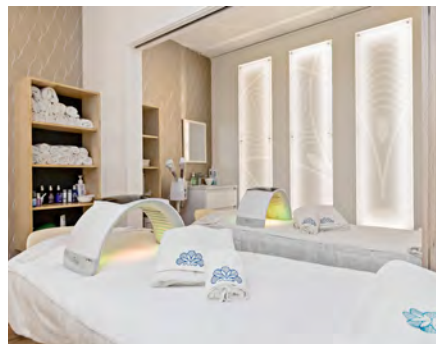

This therapy reduces skin redness, treats rosacea, reduces the appearance of facial blood vessels, and eliminates UV radiation damage. Yellow light is an ideal therapy for sensitive skin because it calms and soothes the skin for a healthier complexion. It also helps to detoxify the skin, boost lymphatic flow and increase cellular growth.

Green Light Therapy

This therapy helps address uneven skin tone and discoloration. Green light control skin pigment by targeting cells called melanocytes and slowing the rate they produce melanin in your skin. It also works to break up clusters of melanin that are the root cause of dark spots.

Blue Light Therapy

This therapy reduces acne and blemishes for a clearer complexion. Blue light kills the bacteria deep within the pores that are the leading cause of breakouts. It also works to soothe and clam any post-acne inflammation.

Supreme Facial

Supreme Facial

60 minutes – **\$200**

Deep Cleansing

Lanréé skin care expert would thoroughly cleanse all impurities and make up residue on the skin surface to prep the skin before proceeding to the subsequence intensive treatment. This step would improve congestions by removing blackheads and blocked pores.

Facial Steaming

Warm steam softens the surface of the skin to remove impurities, bacteria and dirt from the pores. Steam revives tired skin and supports the absorption of moisture increasing the skin's suppleness.

Aqua Microbubble Infusion

This treatment would include a deep surface cleansing procedure, followed by a hot facial patch on the whole face to kill all micro-bacteria and then hydrating essence would be applied which has an anti-aging effect.

Microneedling with Serum Facial for Hydration

Lanréé microneedling facial procedure stimulates the penetration of Serums into the dermis layer with appropriate massage that is specific to anti-aging, facial lifting and tightening, pre tightening, hydrating and anti-inflammatory.

Hydrating Gel Mask + Light Therapy

This hydrating gel mask helps minimise the signs of ageing by stimulating the skin's natural collagen production and effectively restoring the cells back to its optimum health. Photodynamic Light Therapy (PDT) is a non-invasive procedure created to increase cell turnover and stimulate collagen production.

Hydrating Serum

This is the final step of locking in all moisture into the skin, preparing the skin for further rejuvenation with after-care applications at home.

*Note

1. Treatment price and duration listed is for general indication only. It may vary due to different individual's concerns.
2. Price may vary and quote will be provided upon consultation based on area size of treatment if applicable.
3. Package price has to be paid upfront.

Venus Viva MD

90 minutes – **\$880/session**

- Acne Scar Resurfacing
- Body Scar Resurfacing
- Stretch Mark Resurfacing \$1000+

Venus Viva MD™ the latest, newest generation, non-surgical solution for skin resurfacing that corrects signs of skin damage and improves the appearance of acne scars and other scars, stretch marks, enlarged pores, deep wrinkles, and uneven skin texture. During treatment, the micro-needle penetrates deep into the dermis to stimulate the development of newer, healthier skin.

- Uses unique NanoFractional RF™ technology with adjustable ablation and coagulation parameters, to deliver radio frequency energy into the skin, creating micro-channels surrounded by intact tissue.
- Features SmartScan™ technology for uniform and safe energy delivery to all skin types.
- Designed to resurface the skin, which **helps reduce the appearance of acne scars and other scars, deep wrinkles, enlarged pores, and uneven skin texture for all skin types.**
- Two pin options: the **80 pin tip** that can deliver up to 124 mJ/pin and the **160 pin tip** which can deliver up to 62 mJ/pin.

The 160 pin tip is designed to treat a wide range of conditions and is proven to improve the appearance of textural irregularities, fine lines, dyschromia, enlarged pores, and striae. For more severe dermatological concerns such as acne scarring and deep wrinkles, the 80 pin tip is designed to deliver a greater amount of energy per pin, with a lower pin density per area, allowing for more advanced treatments.

The Venus Viva™ MD applicator is equipped with state-of-the-art patented tip technology that delivers up to 700 pulses, with energy penetration of up to 800 µm. The tips are designed for more coverage and therefore faster treatment times, and less downtime. They are better able to address more severe skin conditions, and are particularly effective in treating acne scarring.

THE ONLY SKIN RESURFACING SYSTEM YOU NEED

NOW MORE **CUSTOMIZABLE** THAN EVER

Venus Viva™ MD is a highly effective and customizable skin ablation and resurfacing device, and it now comes with two tip options for treating a range of mild to severe skin conditions.

Treat milder skin texture irregularities with the 160 pin tip, or treat more severe acne scars, scars, and deep rhytides with the 80 pin tip. This device uses NanoFractional Radio Frequency (RF) technology, offering patients a safer, lower downtime, lower risk alternative to traditional skin resurfacing options, while providing equal results. A published clinical study showed that 100% of patients rated their satisfaction with the results of their NanoFractional RF™ treatments as "Excellent," "Very Good," or "Good."¹ With the DiamondPolar™ applicator, employing proprietary (MP)² technology for wrinkle reduction¹, patients can achieve a firmer looking, younger appearance comfortably and with ease.

HIGHLY CUSTOMIZABLE PARAMETERS FOR A WIDE RANGE OF SKIN CONDITIONS

Power and pulse duration are highly tunable to resolve mild to severe skin damage requiring ablation and resurfacing of the skin. Published clinical studies have shown high efficacy of NanoFractional RF™ technology in the cosmetic improvement of striae alba,² skin texture,^{3,4} and pigmentation.⁴

REVOLUTIONARY TECHNOLOGY

The Venus Viva™ MD applicator features NanoFractional RF™ to safely, effectively, and more comfortably address a variety of skin conditions. The Venus Viva™ MD applicator is equipped with the patented SmartScan™ technology, allowing for greater depth of energy penetration, flexible treatment densities, and safer, improved energy delivery for highly effective and visible results.

SAFE FOR ALL SKIN TYPES¹

The Venus Viva™ MD applicator is safe for all skin types, including Fitzpatrick Skin Types IV-VI. A clinical study on striae alba on the thighs, abdomen, and buttocks showed that post-inflammatory hyperpigmentation (PIH) was low with Venus Viva™ at only 18.1%, compared to 81.8% and 36.4% for fractional CO₂ lasers and fractional erbium glass lasers, respectively.²

LOW DOWNTIME

NanoFractional RF™ with SmartScan™ technology is delivered through a small footprint per pin which creates micro-dermal wounds surrounded by in-tact tissue for fast recovery and low downtime.

PiQo4: Deep Reach – For Deep Pigment Shattering

With PiQo4, your customers will appreciate the faster treatment results with shorter treatment sessions. PiQo4 offers up to 15 spot sizes, ranging from 2mm to 15mm, the largest uniform spot size in today's aesthetics industry and almost four times larger than that of the closest competitor.

PiQo4's larger spot sizes allow deeper maintenance of penetration into the

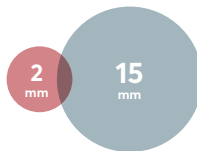

dermis and better dispersal of the pigment or embedded ink particles. Studies have demonstrated that treatment with a large spot size at low fluencies significantly decreases any occurrence of blistering, discoloration or scarring* on the skin's surface, since the energy is being spread over a wider area.

*Brown, Mussarat, Hussain & Goldberg. Cosmetic and Laser Therapy, 2011 13:280-282

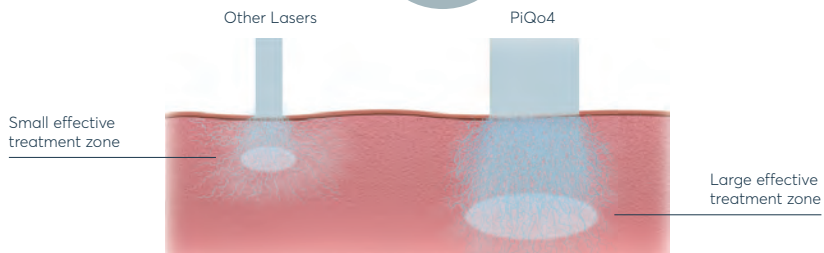

SPW – Spot Size Range

PiQo4 – Spot Size Range

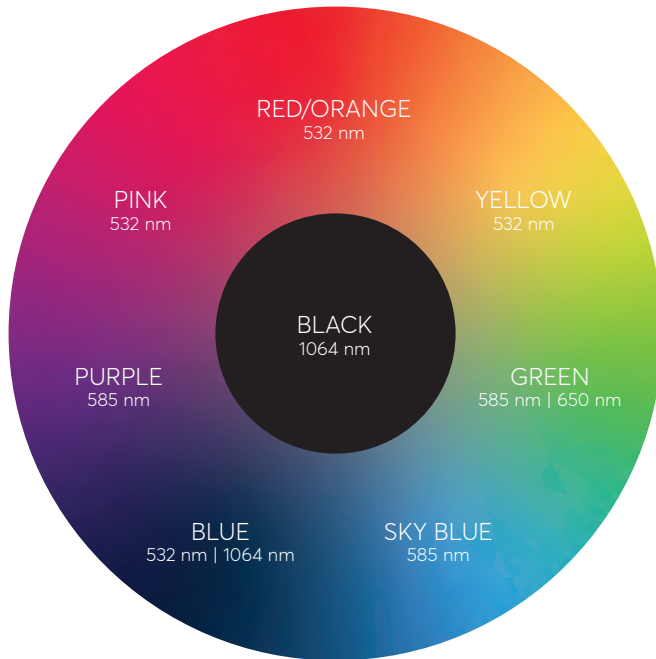

CPS – Spot Size Range

The only treatment which can erase a rainbow

4 Wavelengths – For effective shattering of the most popular pigment/ink colours

Since each pigment color absorbs a specific wavelength, PiQo4 offers 4 wavelengths in order to treat the broadest range of pigment/tattoo colours, on the widest range of skin types. Its four wavelengths - 1064nm, 532nm, 650nm and 585nm - target 9 of the most frequently used tattoo colours ranging from light orange to dark black. With PiQo4 you can erase the rainbow.

Black

Black is the most common ink used in both amateur and professional tattoos. With unrivaled pulse energy and a 15mm spot, PiQo4 is misspelled 1064nm wavelength energy is ideal for these inks, even on a darker skin.

Green

650nm wavelength is most effectively used on greens, the third most popular ink color for tattoos.

Red

Red is the second most common tattoo ink color. PiQo4's 532nm wavelength has 10 times the energy of other laser systems, allowing it to achieve faster clearance of red pigment.

Other

585nm is used on blues, purples, and other colors, completing the removal of multicolor tattoos.

Fotona Starwalker MaQX Melasma Laser

StarWalker® MaQX
Ultra Performance Q-Switched
Laser System

StarWalker® in Auckland, New Zealand

Lanree Aesthetics is excited to be offering the newest treatment for melasma with the most advanced q-switched laser in the market, Fotona's StarWalker®.

What Is StarWalker®?

The StarWalker® is built for maximum performance with patented, state-of-the-art innovations to make treatments safer and more effective. Using acoustic shockwaves, rather than heat, to break apart melasma. Nothing beats the versatility of StarWalker®.

Benefits of StarWalker® Treatments

If you struggle with;

- Sun Damage
- Fine lines and Wrinkles
- Acne Scars
- Melasma
- Uneven Tone and Texture
- Rosacea
- Keloid or surgical scarring

The StarWalker® is an advanced Q-switched laser system with four wavelengths and 15 modalities, making it versatile for a wide range of aesthetic treatments. Key features include:

- **FracTAT® Technology:** Fractional laser treatment for pigmented lesions and skin resurfacing.

- **High Energy & Precision:** Delivers up to 10 J of energy with **Variable Square Pulse (VSP)** and **ASP™** for customizable treatments targeting both epidermal and dermal lesions.
- **Tattoo Removal:** Effective in breaking down tattoo ink with high-energy **Q-switched pulses**.
- **Vascular Treatments:** Includes **VERSA3** and **VERDE™** modes for targeting vascular issues like spider veins and broken capillaries.
- **Versatile Applications:** Treats pigmented lesions, vascular conditions, and more.

The StarWalker® represents an evolution in laser technology, offering powerful and precise treatments across multiple aesthetic needs.

"One of the best melasma laser treatment in the market"

- Can treat active melasma
- Game changer for melasma

Why Fotona StarWalker MaQX is Effective for Melasma

- The **Fotona StarWalker MaQX** is an advanced laser system that safely and effectively treats melasma with minimal risk of worsening pigmentation. Its **fractional picosecond** and **Q-switched nanosecond**

technology makes it superior to traditional lasers.

How It Works:

- **Ultra-Short Pulse Technology (ASP)** – Breaks down melanin into tiny particles without overheating the skin, reducing post-inflammatory hyperpigmentation (PIH).
- **FracTAT® Technology** – Creates microchannels to enhance melanin clearance and stimulate collagen production.
- **Dual Wavelengths (Nd:YAG 1064 nm & 532 nm)** – Targets both deep and superficial pigmentation for comprehensive melasma treatment.

Benefits:

- **Breaks down melanin safely** – Uses short pulses to fragment and clear pigmentation.
- **Minimizes heat damage** – Prevents PIH and ensures safe energy delivery.
- **Stimulates skin healing** – Improves texture and promotes collagen production.
- **Safe for all skin types** – Reduces risk of rebound pigmentation, ideal for darker skin tones.
- **Minimal downtime** – Gradual lightening over multiple sessions with quick recovery.

Fotona StarWalker MaQX offers a safer, more effective approach to melasma treatment, delivering a brighter, even-toned complexion with lasting results.

FoLix by Lumenis

– Now at Lanréé Aesthetics

The world's first FDA-cleared non-invasive fractional laser treatment for hair regrowth.

First clinic in NZ & Australia to offer this breakthrough solution!

FoLix ™
BY LUMENIS

Why FoLix Works

- **1565 nm Laser Precision** – Penetrates deep to the follicle base for true regeneration.
- **Non-Ablative Technology** – No damage, no downtime, no visible marks.
- **Reactivates Dormant Follicles** – Ideal for early to moderate thinning.
- **Clinically Proven** – Noticeable density improvements in 4–6 sessions.
- **Safe & Comfortable**

Smart Features

- **Energy Algorithm:** Ensures even laser coverage for optimal results.
- **FoliCool™ Tip:** Cooling + hair separation for maximum comfort.
- **Quick & Easy:** 30–45 mins, no injections, no medications.

TRENDS

By Masa Gorsic Krisper

Fotona4D® is a unique laser treatment for achieving a natural looking facelift, without surgery or downtime. This revolutionary laser treatment is an investment in yourself that is sure to pay off.

Fotona4D®: A Revolutionary Non-invasive Laser Facelift

There is little-to-no downtime, the procedure is done without any kind of anesthesia, and it can be performed all year-round.

Fotona4D® is synergistic, non-invasive laser treatments of both the exterior facial and interior oral cavity, enabling full-thickness contraction of collagen for persistent tightening and volumization. There is little-to-no downtime, no injectables or anesthesia required, and it can safely be performed all year-round.

Two wavelengths, 4 treatment modes

With two laser wavelengths (Er:YAG and Nd:YAG) and 4 treatment modes, anti-aging with Fotona4D® is approached from 4 different levels and 4 different modes of action. The treatment works on deeper, medial and superficial connective structures of the skin, as well as targets imperfections. With Fotona4D® we can achieve immediate freshness and tightness - it's like an investment in the quality of the skin to look fresher and younger!

With Fotona4D® treatment we can achieve immediate freshness and tightness of the skin to look fresher and younger.

Fotona 4D® addresses several dimensions of skin care simultaneously:

- **Wrinkles and folds**
- **Pigmentation:** freckles, sun spots, or other darkened patches
- **Loss of skin tone**
- **Dull skin**

The four "dimensions" of Fotona4D® refer to four distinct treatments that can be performed with Fotona's aesthetic laser platforms*: SmoothLiftin™, FRAC3®, PIANO® and SupErfacial™. These unique aesthetic modes are all harnessed in concert to combat facial aging, with each modality targeted to treat a different aspect of aging-related skin conditions.

With a single laser platform, Fotona 4D® effectively combines skin resurfacing, intraoral mucosa tightening, and global toning and tightening of facial skin and deeper structures, including shrinkable connective tissue, for anchoring areas of the superficial musculoaponeurotic system (SMAS) layer in a single minimally invasive treatment.

* SP Dynamis & SP Spectro as well as the new TimeWalker system

Fotona 4D® combines synergistic non-invasive laser treatments of both the exterior facial and interior oral cavity.

Thermage® FLX

Thermage FLX is a non-invasive RadioFrequency (RF) therapy that can smoothen, tighten and contour skin on the face, eyes and body for an overall younger-looking appearance in a single treatment.

NON-INVASIVE SKIN TIGHTENING FOR THE FACE, EYES AND BODY

WHAT IS ACCUREP™ TECHNOLOGY

The Thermage FLX™ system integrates tuning pulses into each individual radiofrequency energy pulse (IREPI). These tuning pulses automatically measure local impedance values and adjust energy output parameters to deliver consistent energy from one treatment site to the next.

AGEING IS WHAT YOU MAKE OF IT

THERMAGE FOR YOU

- Maximum flexibility to treat more areas on more patients all with a single treatment platform
- ACCURE™ TECHNOLOGY Optimised treatment algorithm with site specific real-time tuning
- Fast treatment times, up to 25% faster treatment time with the new Total Tip 4.0*
- Instantaneous system start-up minimises wait for system readiness after start-up and touchscreen user interface

THERMAGE FOR YOUR PATIENTS

- Smooth, tighten and contour skin without surgery or injections
- Vibration available for both face and body treatments for increased patient comfort
- For most patients, results gradually appear in the two to six months following a single treatment. Results can last years depending on skin condition and ageing process

TREATMENT OPTIONS FOR THE FACE, EYES AND BODY

NEW TOTAL TIP 4.0
Up to 25% faster than Total Tip 3.0. Uses precise heating to smooth and tighten.

EYE TIP 0.25
Uses precise, shallow heating to smooth the skin.

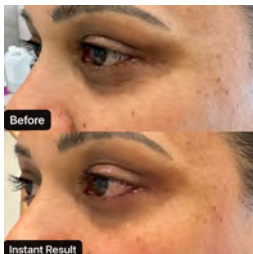

BODY TIP 16.0
Now offers vibration enhancements for more effective and comfortable body treatments.

TOTAL TIP 3.0
Smaller tip option available for smaller treatment areas.

NON-INVASIVE SKIN TIGHTENING FOR THE FACE, EYES AND BODY

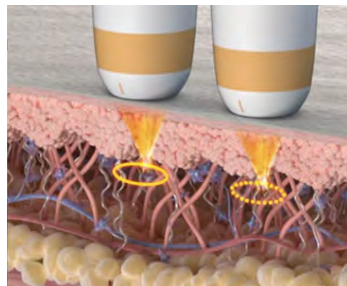

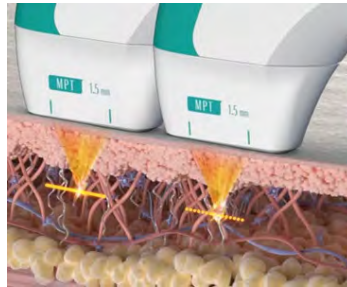

ULTRAFORMER MPT

Ultraformer MPT Time Freezing Lifting and Body Contouring

Ultraformer MPT is the latest in HIFU technology, delivering fast and effective results. Featuring Micro Pulse (MP) Mode and Booster hand pieces for enhanced and refined lifting results to fight signs of ageing. The new Ultraformer MPT, is safer and maximises MMFU(Micro & Macro focused Ultrasound) efficiency by dividing the TCP (Thermal coagulation point) generating method into micro-unit beyond the technology to create precise TCP quality.

This treatment is highly customisable, our therapists will tailor the treatment depending on your skin condition and desired results.

Ultherapy PRIME® -The Science of Natural Lifting

**FDA-cleared, non-invasive,
and clinically proven.**

Ultherapy®
P R I M E

Ultherapy PRIME® is an advanced skin-lifting treatment that goes **beneath the surface of the skin** to target the **same foundational layers treated in surgical facelifts**, without cutting, needles, or downtime.

By precisely delivering **micro-focused ultrasound energy** at controlled depths, Ultherapy PRIME® initiates a **regenerative response**, stimulating your body to produce new **collagen and elastin naturally**—resulting in **gradual lifting, firming, and tightening** that lasts up to a year or more.

Why Ultherapy PRIME® is Different

Unlike treatments that only work on the skin's surface, Ultherapy PRIME® penetrates deep into multiple foundational layers—including the **SMAS (Superficial Musculoaponeurotic System)**, the same layer targeted in surgical facelifts—without disrupting the skin surface.

How it works:

1. **Ultrasound energy is delivered deep into the skin** to create precise thermal points.
2. This triggers the body's natural healing process.
3. Over time, your skin **rebuilds collagen and elastin**, restoring firmness and lift.

Precision with Real-Time Imaging

Ultherapy PRIME® is the only **FDA-cleared lifting device that uses live ultrasound imaging**, allowing your practitioner to:

- **Visualize tissue layers in real-time**
- Deliver energy **precisely where it's needed**
- Customize treatment for your unique skin structure
- Avoid unnecessary risk to surrounding structures

This means **more accuracy, greater safety, and better results** than ever before.

Ultherapy Prime

Half Face (Cheek + Jawline)

\$2800 / session

Coolshaping2™ Fat Freezing

Each body area requires 1-6 applicators per session. Only one session is required per body part depending on desired results.

Fat freezing works through a process called Apoptosis. The body will naturally get rid of cells that have been damaged beyond repair. The 360° Stereoscopic Cooling from the Coolshaping2™ machine acts as a vacuum which will freeze the body fat at temperatures between -5°C and -10°C, killing the fat cells. This 360° cooling technology covers much larger and deeper areas of fat in comparison to traditional fat freezing devices which use a top down cooling system. Once fat cells have been destroyed they are then naturally removed from the body through the metabolism for up to 6 months. Treated body parts will start to reduce in size from the first week post treatment. A balanced lifestyle and healthy diet with sufficient water intake will speed up the metabolism process and reduced body size will remain.

Coolshaping2™ is a state of the art fat freezing machine which allows for more area coverage and better results in a shorter period of time compared to similar devices. Coolshaping2 is TGA certified and provides the latest fat freezing treatment technology on the market, using a 360 degree Stereoscopic Cooling System.

1 Applicators	\$600 / applicator
2 Applicators	\$480 / applicator
4 Applicators	\$400 / applicator
6 Applicators	\$360 / applicator
8+ Applicators	\$300 / applicator

The Technology

CoolShaping2™ is a (TGA Certified-ARTG No. 371276) procedure that reduces fat in target areas using cryolipolysis, vibrating-vacuum & LED technologies.

CoolShaping2™ offers non-invasive cryo-cooling (cryolipolysis) to permanently reduce fat cells by breaking down targeted fat.

CoolShaping2™ is also designed to protect the skin surface, with the cryo-energy only crystallising fat cells in the treatment area without damaging the surrounding tissue.

Unique Benefits

The unique 360° cooling applicator targets fat using balanced cryolipolysis, this allows larger areas of the body to be treated per session.

ASCE+ Exosome with Mesotherapy: Advanced Skin Rejuvenation from Korea

\$800/session

A revolutionary anti-aging therapy that combines next-generation exosome technology with the precision of mesotherapy microinjections—bringing science and beauty together for unmatched skin renewal.

What Are Exosomes?

Exosomes are nano-sized extracellular vesicles naturally secreted by stem cells. They act as messengers, delivering essential bioactive molecules—including growth factors, peptides, amino acids, coenzymes, and nucleic acids—to target cells in the skin.

These components are vital for:

- Stimulating **collagen and elastin synthesis**
- Accelerating **skin repair**
- Modulating **inflammation** for healthier, calmer skin

ASCE+ (Advanced Stem Cell Exosomes) is derived from **human adipose stem cells** through a patented purification process, ensuring **maximum potency and clinical-grade purity** for visible results.

How Do They Work?

Exosomes communicate directly with skin cells, reactivating their regenerative capacity.

This results in:

- **Smoother, more radiant complexion**
- **Deep hydration & plumper texture**
- **Reduced redness and rosacea**
- **Stronger, more resilient skin barrier**
- **Improved elasticity and overall skin health**

Derma Shine Balance Booster Mesotherapy

\$800/session

This treatment allows active ingredients to pass through the stratum corneum through a 9 pin Auto Sensing Injection System, allowing trans dermal solution to reach the deeper skin layers, penetrating the targeted area with concerns.

i) Ultimate Hydration Injection

Serum injection includes Fillmed MHA 10 + Cytocare 516 + Innoaesthetics Transdermal Hyaluronic Acid

Active Ingredients: Hyaluronic Acid

Suitable to:

- Intensively hydrates the skin
- Powerful Anti-Aging Effect
- Improves Skin Textures

Duration & Interval: Recommend at least 3 sessions per year, at least 4 weeks interval between sessions

This treatment promotes skin hydration, improves fibroblasts activity and restores glycosaminycons levels lost with age.

ii) Gluthathione Glowing Injection

Serum injection includes Fillmed MHA 10 + Innoaesthetics Transdermal Restructurer

Active Ingredients: Ascorbic Acid (Vitamin C), Gluthathione, Lipoic Acid, Superoxide Dismutase, Hyaluronic Acid

Suitable to:

- Prevent cell oxidation
- Improve early signs of ageing
- Balance uneven pigmentation

Duration & Interval: Recommend at least 3 sessions per year, at least 4 weeks interval between sessions

This treatment prevents oxidative stress and controls free radical formation.

Vitamin C

Works as an antiaging agent as it protects your skin from free radical damage and enhances your skin natural defenses to UV rays.

INNOAESTHETICS

Acne Banish Skin Injection

\$800/session

The Transdermal solution for
acne-prone skin.

Serum injection includes Fillmed

MHA 10 + Innoaesthetics
Transdermal AKN-ID

Active Ingredients:

Pyruvic Acid, Zinc, Niacinamide,
Melilotus, Taurine, Peptides

Its ingredients regulate sebum
production, reduce pore-clogging
and inflammation, and strengthen
the skin barrier, effectively restoring
skin structure.

Suitable for:

- Acne-prone skin
- Sebum regulating
- Oily skin

Duration & Interval:

Recommend at least 1- 3 sessions for
mild acne and 3-6 sessions for medium
to severe acne with at least 4 weeks
interval between sessions, until acne
is fully healed and breakout is under
control.

Rejuran Skin Healer

Rejuran™ Healer Booster Injection

\$800/session (1.5 hr duration)

Our Rejuran™ Healer Booster Injection is delivered through the newest Mesotherapy Injector Gun technology. The latest skin healing injection from South Korea. This serum helps to strengthen the skin barrier and improve the overall skin environment.

Suitable for:

- Anti-aging
- Uneven skin tone and texture
- Skin firming
- Improve elasticity and hydration
- Reducing inflammation and fine lines
- Fibroblasts and promoting blood vessel growth.

What is C-PDRN?

- Through DOT (DNA Optimization technology), the DNA of salmon is extracted and made into specific DNA fragments.
- The purified size is 1/670 of the pore, with ultra-high permeability and absorption rate.
- Helps to strengthen the skin barrier and improve the overall skin environment.

We typically recommend the first 3 sessions every 4-6 weeks. Your therapists will advise on your treatment day what course of treatments is best suited to your skin condition.

Goodbye Cellulite

Powered by FocalRF technology NuEra Tight applies multiple frequencies, two treatment modes and effective mechanical massage for connective tissue manipulation, to remodel cellulite and improve the appearance of bumps and dimpling.

BTL EMSELLA – For Women

BTL EMSELLA is a great option for women of any age who desire solution for urinary incontinence, recovery after childbirth and improvement in their quality of life.

BTL EMSELLA Treatments

\$400/session
or **\$2200/6 sessions**

How long is the treatment and how many sessions do I need?

We will tailor a treatment plan for you. A typical treatment takes about 30 minutes and you will need 6 sessions, scheduled twice a week.

What does the procedure feel like?

You will experience tingling and pelvic floor muscles contractions during the procedure. You may resume daily activities immediately after treatment. You may start treatment 3 months after delivery.

How fast will I see results?

You may observe improvement after a single session. The results will typically continue to improve over the next few weeks.

Before

Weak pelvic floor muscle insufficiently support pelvic organs, bladder control, and they may decrease intimate satisfaction.

Treatment

BTL EMSELLA effectively stimulates pelvic floor muscles.

After

Stimulation leads to regained control over pelvic floor muscle and bladder which can contribute to overall intimate satisfaction.
